Forecast for Thursday 09 Jun 2022

Weather: Dry with clear spells during the early hours, but clouding over from the southwest soon after dawn with outbreaks of rain and drizzle developing by mid-morning. The odd heavier burst of rain is possible around midday, with lighter outbreaks of rain and drizzle persisting throughout the afternoon. Becoming dry by early evening with low cloud gradually lifting and breaking to leave some clear spells.

Chance of cloud-free hill tops above 600m: 70% at first deteriorating to 10% or less mid-morning onwards. Improving to 70% during the evening.

Low cloud and visibility: Occasional patches of cloud near 500m over some southwestern slopes during the early hours and at first Thursday morning before more extensive low cloud develops on slopes above 400m mid-morning onwards. Low cloud will lift and break early evening onwards leaving occasional patches near 500m, these again mainly over southwestern slopes. Visibility beneath cloud initially good, but becoming moderate or poor in rain and drizzle. Improving later as rain clears to become generally good beneath any cloud.
